

6516207590.txt

I feel that subscribers to satellite radio have a right to whatever information they provide, especially local traffic and weather. If we are paying for the services, we deserve whatever information we want. Why should we be forced to listen to local commercial-laden local radio just to support their advertisers. Please do not limit XM Radio from providing us such information. As a consumer, I want options for receiving this information. Don't let the local stations deny us this information we are paying to receive.

Thank you!

Cheryl Lauer
